

Network Specialist

Reach your career goals with Eirgen Pharma, your future could be here

Would you like to be part of a company that has the courage, innovation, and capability to improve and enhance patient lives across the globe?

Eirgen was founded in 2005 and since then we have continually grown and now employ over 180 employees at our site in Waterford. Our strengths lie in our capability to rapidly introduce new products and add additional volume to existing products - ensuring supply for new product launches and expanding market opportunities.

What makes us different is that while we continue to grow our business we have still maintained that small company feel to our culture which enables us to ensure that our employees are always front and centre in everything we do. By creating a progressive and dynamic working environment, where hard work and enjoyment aren't mutually exclusive, we have created a high performing, people-centric culture which allows us to work in an environment where the focus is always on ensuring that the patient comes first.

About the Job

In this role you will ensure that site network and IT infrastructure systems are introduced, maintained and operate in accordance with cGMP's, site, Head Office and regulatory requirements with a keen focus on Data Integrity, Security and Reliability.

The position will work closely with all members of the site IT team as well as with corporate IT Colleagues.

Primary responsibilities of this role include the following:

- Manage and maintain the company's IT infrastructure, while also ensuring compliance with cGMP's, site and regulatory requirements (21 CFR Part 11, Annex 11 EU GMP).
- Maintain 99.99% network uptime by proactively monitoring, optimizing, and securing network infrastructure.
- Implement redundancy, timely upgrades, and rapid incident response strategies to minimize downtime and ensure seamless connectivity for users and business operations.
- Configure and support network devices such as routers, switches, firewalls, and load balancers.
- Monitor network performance, diagnose issues, and implement necessary optimizations.
- Ensure network security by implementing firewalls, encryption, and intrusion detection/prevention systems.
- Conduct regular network assessments and performance evaluations.
- Collaborate with IT teams to support new technologies and improve existing systems.
- Provide technical support and guidance to users and internal teams.

- Maintain network documentation and update configurations as needed.
- Ensure compliance with industry standards and security protocols.
- Stay updated on emerging networking technologies and best practices.
- Engage with cross-departmental teams for IT support required for project work and system implementations.

About you

You are educated to a minimum of degree level in computer science, computer engineering, life science, or any other pertinent degree. Your experience includes network administration ideally within the Pharma industry.

You also possess cross-functional project experience and exhibit a focused continuous improvement mindset.

As a real team player you will draw from your many skills such as decisiveness, compliance focus, planning, multi-tasking, project and time management. You have the ability to form strong relationships and negotiate and influence cross functionally, you enjoy collaborating, gaining knowledge, continuous improvement and solving problems.

Working at Eirgen – What to expect

At Eirgen, we have developed a diverse, people-centric, high performance culture where people are enabled to achieve their potential.

If you are working at Eirgen, then we think you've got something special. Our employees are high-performing and work as part of a cohesive team, they are dedicated people who are driven to succeed and are rewarded with competitive salaries and an attractive range of benefits including opportunities for career progression and further education.

Apply for the above role by sending your CV to opportunities@eirgen.com including the job title in the subject.
