

Maintenance Technician (1yr FTC)

Reach your career goals with Eirgen Pharma, your future could be here

Would you like to be part of a company that has the courage, innovation, and capability to improve and enhance patient lives across the globe?

Eirgen was founded in 2005 and since then we have continually grown and now employ over 180 employees at our site in Waterford. Our strengths lie in our capability to rapidly introduce new products and add additional volume to existing products - ensuring supply for new product launches and expanding market opportunities.

What makes us different is that while we continue to grow our business we have still maintained that small company feel to our culture which enables us to ensure that our employees are always front and centre in everything we do. By creating a progressive and dynamic working environment, where hard work and enjoyment aren't mutually exclusive, we have created a high performing, people-centric culture which allows us to work in an environment where the focus is always on ensuring that the patient comes first.

About the Job

In the role you will:

- Understand in detail how process & plant equipment operates (examples include tablet & capsule manufacturing & packaging process equipment, chillers, boilers, HVAC, compressed air systems, nitrogen systems, waste water, lab gases, electrical distribution, back up generation, general office services).
- Develop predictive maintenance methodologies utilizing PEMAC Maintenance Management system.
- Develop and continuously improve preventative maintenance routines based on RCM methodologies.
- Develop and comply with relevant SOPs.
- Ensure spare parts requirements are available and cost effective for equipment.
- Develop spare parts lists for various equipment.
- Provide effective problem solving and reactive maintenance as required.
- Measure equipment performance in terms of downtime, yield if applicable, efficiency and cost of maintenance.
- Develop relationships with vendors and develop maintenance contracts.
- Ensure the preventative maintenance routines are executed on time and in a compliant manner.
- Comply at all times with the Health, Safety and Environmental policy and associated procedures.
- Continuously promote a positive safety culture by challenging yourself and others to prioritize safety in everything you do.
- Liaise with contractors managing inductions, work permits & RAMS
- Ensure all work carried out, is in compliance with the required standards, conforming to company, cGMP, cGLP, SOPs and regulatory guidelines.
- Take ownership for quality compliance in all activities you are responsible for.

About you

You possess a senior trade qualification, while a relevant third level qualification in an Electrical, Mechanical or Manufacturing discipline is an advantage. You have maintenance experience within a

regulated environment (preferably within a Pharma manufacturing) and ideally experience in the use of a Maintenance Management System.

You will draw from your many skills such as planning, multi-tasking and time management. You have the ability to form positive relationships and enjoy collaborating, gaining knowledge, continuous improvement and solving problems.
